Unit Testing

Projects

[Power Ranking](#)

[GitHub Front-End](#)

[GitHub Back-End](#)

Web Application where a user can vote on their top three and least favorite items in any given topic and generate score. The score can also be generated through Twitter by tweeting at the official Power Ranking App.

Tech Stack:

Node.js • Express • Angular 2 • Postgres • Bootstrap

[Raspberry Pi Smart TV](#)

Created a Smart TV using a Raspberry Pi and a hybrid app, where a user can install Node on their Raspberry Pi, clone the repository, input their IP address in the app, search for a video and hit play.

Tech Stack:

Node.js • Express • Socket.io • Ionic • Raspberry Pi

Experience

Galvanize - Web Development Immersive
August 2016 - January 2017

Built numerous Web Applications and participated in all exercises to further develop skills necessary for continuation of the program. Emulated different styles of workflow like paired programming, group programming, and solo research.
